

CANNABIS SAFE STORAGE

New York

Call the Poison Center at 1-800-222-1222 if you think someone has been accidentally exposed to a cannabis product or consumed too much. Call 911 if the person is showing signs of an emergency.

KEEP CANNABIS LOCKED, OUT OF SIGHT & OUT OF REACH.

Store all your products in a locked container or inside a lockable drawer or filing cabinet. It's not enough to keep them out of reach – they should be locked and out of sight to prevent young people from accessing cannabis! Be mindful to clean up any flower that's been ground, crumbs, lighters, or matches that may be left out after you consume.

KEEP IT SEPARATE.

Infused cannabis products like drinks or gummies should not be stored in a shared fridge or pantry near other food products where they may be accidentally consumed.

KEEP CANNABIS PRODUCTS IN THE ORIGINAL PACKAGING.

The packaging is child-resistant and proven to slow down curious young people. Your product label displays cautionary warnings and key information in case of an emergency.

TALK TO FAMILY MEMBERS & CAREGIVERS.

If someone is visiting your home or watching your child or pet in your home or theirs, talk to them about locking their cannabis away.
